7200 Accessories

Model 7200 is supplied with a 10x10mm cuvette holder as standard. The clever design of this instrument ensures that it is compatible with the existing range of Jenway passive accessories from the 63, 73 and 67 series range. These include a test tube holder, adjustable path length (10 to 100mm) cuvette holder and a micro-cuvette holder. All of the accessories are easy to interchange using the ergonomic thumb screw.

Temperature control

For applications where the temperature of the sample needs to be controlled there is a heated cell accessory for thermostatted measurements at 37°C. The heated cell holder accepts 10x10mm cuvettes and can be easily fitted and removed without the need for any tools. This accessory has a temperature range of 32 to 42°C with a resolution of 0.5°C. The heated cell accessory is supplied with a UK, EU and US power lead which is required to power the spectrophotometer and the heated cell. The heated cell is controlled by the operating software on the instrument.

Printing

There is also an external printer available for instant results. Spectrum and kinetics graphs are printed in the vertical direction to maximise the amount of information displayed. The spectrophotometer can be set up to either manually or automatically send results to the printer. The printer connects to the 7200 via the USB port on the rear of the spectrophotometer. The printer has a rechargeable battery and is supplied with UK, EU and US power leads.

Cell Holders

Part Code	Description
630 204	10 x 10mm path length cuvette holder
637 071	10mm square cuvettes and 16, 24mm test tube holder
630 005	10 to 100mm path length cuvette holder
630 304	Micro-cuvette holder with reduced aperture
725 201	Heated cell 10 x 10mm cuvette holder supplied with UK, EU and US power leads

Other Accessories

Part Code	Description
SMP50PRINTER	External printer supplied with UK, EU and US power leads
037 702	Paper roll for printer
019 146	4GB USB memory stick
700 000	Dust cover
012 050	Tungsten halogen lamp
